

1. Data Preparation Agent Test Prompt

Take the data from:

- bank_statement_march_2026.csv
- transaction_history_march.csv
- receipts_batch_march.md
- manual_cash_log_march.md

Clean and standardize all transactions into a single structured format with:

- date
- description
- amount
- type (income or expense)

Normalize inconsistent formats and remove obvious duplicates.
Return only the cleaned transaction list.

2. Categorization Agent Test Prompt

Using cleaned_transactions_march.csv and category_rules.md, assign a category to each transaction.

- Follow the rules where applicable. If a transaction is unclear, label it as "Uncategorized".
- Return the transactions with the added category field, without modifying any other data.

3. Reconciliation Agent Test Prompt

Compare bank_statement_march_clean.csv with internal_ledger_march.csv and reconciliation_notes.md

Match transactions and identify:

- missing entries
- duplicates
- mismatches (with reason)

Return a clear reconciliation report showing these issues.

4. Reporting Agent Test Prompt

Using categorized_transactions_q1_2026.csv and monthly_summary_template.md, generate a financial summary.

Include:

- total income
- total expenses
- net income
- breakdown by category

Ensure all totals are accurate and clearly presented.

5. Insights Agent — Test Prompt

Using monthly_financial_summary_q1.md and trend_comparison_q1.csv, analyze the data and produce 3 to 5 key insights.

Focus on trends, unusual changes, and potential risks. Keep each insight concise and based only on the data provided.
